About This Game

Claw Breaker is an epic party fighting game full of scoops, snips, and salt. Beware, shouting and excitement may occur in this ultimate two-player claw-down of action-packed slashing and melee attacks.

Use a variety of cutting maneuvers while on the offensive -- scoop, snip, and even dirty tricks like the salty taunt. If you're missing a claw, swap your strategy by collecting all of the starfish for a defensive victory!

Each stage holds different strategic formations offering new and exciting ways to find an advantage. Until you've taken both claws from your opponent, anything is possible. Ready, FIGHT!

Worth noting: this is a SMALL fighter, much more along the lines of the original Nidhogg than the lines of a traditional fighting game or a character brawler. There is no character select, and there are only six stages.

That said, this game is remarkable for just how much game there is in these limited elements. The claws are each manipulated using the analog sticks, which leads to an incredibly expressive array of options on attack and defense. Fights play out wildly differently, and (as seen in the video) can be very short and intense. When I sit down with Claw Breaker, I often end up putting in 50-60 rounds, since matches are so brief and varied. This also means that despite having just one character you'll end up feeling like you're playing many different "matchups" since different players will build very different skillsets and take very different strategic approaches.

Overall, this game rocks, but don't go in thinking it'll have a giant swath of content or ANY single-player material whatsoever. What you'll get is an immensely entertaining 1v1 dueling game with delightful gameplay and hilarious consequences. It's got a narrow scope, but within that scope, it's a total gem.
